

# GeoAfrika

## Surveys

Providing accurate spatial data and survey management services across all aspects of the built environment.

V1.0

---

## Combining years of on-the-ground experience with expertise in pioneering Geomatics technology.

GeoAfrika Surveys specialises in the efficient capture, analysis and representation of spatial data for use throughout the development process. With a core focus on land rights and management, the division has also developed focused, specialised expertise in technical fields like engineering surveying, laser scanning and drone services. GeoAfrika Surveys is experienced at both large-scale infrastructure projects and smaller-scale developments, and is a Level 1 B-BBEE Service Provider.

As a division, GeoAfrika Surveys has a project footprint that spans across Southern Africa, as well as Nigeria, Mali, Ethiopia, Kenya and the United Kingdom. With a team of senior surveyors boasting over 25 years of experience, there are very few challenges the team hasn't faced and solved themselves. This on-the-ground expertise is complemented by a focus on best leveraging new technologies, with the division continually pioneering new uses of survey technology in the local context.

### Our services include:

- Land rights consulting
- Sectional title surveys
- Development management
- Topographical surveys
- Construction supervisory surveys
- Engineering survey consulting
- Laser scanning
